SUMMARY

AI/ML undergraduate specializing in LLMs, Agentic RAG, NLP, and Computer Vision, with hands-on experience building production-ready AI systems. Developed a multilingual voice agent integrating Speech-to-Text (STT), LLMs, and Text-to-Speech (TTS) achieving minimum latency. Strong foundation in data structures, probability, and statistics, with proven ability to deliver measurable impact through real-world AI projects.

EXPERIENCE

AI/ML Intern

Jan 2026 – Apr 2026 (Present)

Indux Technology

Remote

- Designing a production-grade multilingual voice agent integrating STT, LLM, and TTS modules with asynchronous orchestration, targeting sub-8s end-to-end latency for Hindi, English, and Hinglish.
- Implementing audio preprocessing pipeline (16kHz resampling, silence trimming, noise reduction) and LLM inference optimization to reduce model response time.
- Developing a 7-class multilingual intent detection engine (booking, inquiry, complaint, sales, escalation, fallback, confirmation) using supervised classification, verified across three language inputs.

AI Intern

Jun 2025 – Dec 2025

Growdemy

Remote

- Built a real-time facial emotion detection app using CNN and OpenCV, identifying 7 emotions (happy, sad, angry, fearful, disgusted, surprised, neutral) from live webcam feed.
- Trained a deep CNN on FER2013 dataset with face detection preprocessing; deployed interactive Streamlit interface with emoji overlays and confidence score visualization.

PROJECTS

Document-Based RAG Agent | *LangChain, Gemini API, FAISS, Sentence Transformers, Streamlit* | [GitHub](#)

Jan 2026

- Built an agentic RAG system for unstructured data processing – autonomously retrieves context from PDF documents via agent decision loop, generating grounded, citation-aware responses.
- Implemented hybrid keyword + semantic search over FAISS vector embeddings; achieved 40% reduction in irrelevant responses vs. keyword-only baseline via precision@k metrics.

Text Style Transfer Application | *PyTorch, Transformers, RNN, LSTM, Hugging Face, Gradio* | [GitHub](#)

Nov – Dec 2025

- Designed a bidirectional NLP application for text style transfer; trained on a custom 10K+ sentence-pair dataset with ablation study comparing RNN, LSTM, and Transformer architectures.
- Transformer achieved 35% higher BLEU score via attention mechanisms; demonstrated superiority of foundation model fine-tuning on style-sensitive generation tasks.

ComicCrafter-AI | *Generative AI, Gemini LLM, Stability AI, Streamlit* | [GitHub](#)

Jan – Mar 2025

- Developed comic strip generation platform integrating Gemini LLM for narrative generation and Stability AI for sequential image synthesis, achieving 90%+ coherent story-to-visual mapping.
- Built multi-model orchestration pipeline with intelligent prompt engineering; optimized API efficiency for production-ready educational content generation at scale.

TECHNICAL SKILLS

Languages: Python, SQL, C++

ML / AI Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn

LLMs & Agentic AI: LangChain, RAG, Gemini API, Hugging Face, Fine-tuning, Prompt Engineering, FAISS

NLP & Speech: Multilingual NLP, Indic Languages, STT/TTS, Audio Processing, NLTK, SpaCy, Sentence Transformers

ML Concepts: Neural Networks, CNN, RNN, LSTM, Transformers, Attention, Supervised & Unsupervised Learning

Tools & Platforms: Git, Google Colab, Streamlit, Gradio, HuggingFace Spaces, Docker

EDUCATION

Baba Farid College of Engineering and Technology

Bathinda, Punjab

B.Tech – Computer Science Engineering (AI & Machine Learning)

Aug 2023 – May 2027

Meritorious School

Ferozepur, Punjab

Senior Secondary – Science Stream | 92%

May 2023

CERTIFICATIONS

5-Day AI Agents Intensive – Google (Dec 2025)

Data Analytics Certificate – Deloitte (Aug 2025)

Generative AI with Microsoft Copilot (Sep 2024)

Advanced Python Programming – AppSquadz EduTech (May 2024)
